Davis Law Group, P.S.

Dear Davis Law Firm,

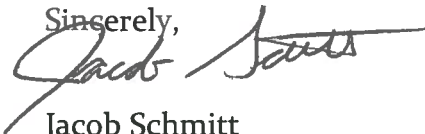

March 1, 2014

My name is Jacob Schmitt and I am a technical mathematics teacher at Marysville Middle School. My math class is working on a career unit where they are applying real world mathematics in the context of a real job. They are also starting to think about what career they would like to have when they get older.

They are writing you a letter asking you a few questions they have about your field and the math that is involved. Answering a question or two about your field, as well as your company would sure mean a lot to them. They want to be in your profession and one day work alongside of you a colleague. I enclosed a letter from them choosing your place of business as a career they would like to pursue. I have enclosed a self addressed envelope with a stamp for a return message.

Thank you again for your time and look forward to hearing back from you in the future. If you are willing to speak with my class about your career and what your job entails that would be great. I am always trying to get more of industry involved in my classroom.

Sincerely,

Jacob Schmitt

Dear Davis Law Group,

My name is Carmen.
I am doing a project for
School and I would like to
ask you some questions.

What kind of math do
you use in your career?

How much time/effort do you put
in your career? What inspired
you to become a lawyer?

Thank you for your time.

Sincerely,

Carmen Cain
